Binary Tree Level Order Traversal I

```python
from collections import deque
class Solution:
  def levelOrder(self, root):
    if not root:
      return []
    queue = deque([root]) # queue = deque();queue.append(root)
    result = []
    while queue:
      node = queue.popleft()
      result.append(node.val)
      if node.left:
        queue.append(node.left)
      if node.right:
        queue.append(node.right)
    return result
```
