Perfect Shuffle

```python
import random
class Solution(object):
  def shuffle(self, array):
    """
    input: int [] array
    """
    for i in range(len(array) - 1, -1, -1):
      rand = random.randint(0, i)
      array[i], array[rand] = array[rand], array[i]
    return array
```
